Hyderabad, Telangana, India

OBJECTIVE

Career-driven individual seeking an opportunity in a performance-oriented software development environment to apply strong programming and problem-solving skills. Eager to learn new technologies and understand real-world system requirements to build efficient and scalable applications. Committed to writing clean code, collaborating effectively with teams, and delivering high-quality solutions. Adaptable, quick to learn, and motivated to contribute to team success and organizational growth.

SKILLS

Languages & Libraries	Python, Pandas, NumPy, Matplotlib, Sklearn
Frameworks	Django,JavaScript,MERN Stack
Tools & Visualizations	Excel, Tableau, Visual Studio, Google Colab
Database	MongoDB,MySQL
Data & AI	Data Analysis, Machine Learning, Supervised & Unsupervised Learning, Reinforcement Learning
Version Control System	Git,GitHub
Soft Skills	Critical Thinking,Data-Driven Decision Making,Team Managemement

EDUCATION

MEGHA INSTITUTE OF ENGINEERING AND TECHNOLOGY FOR WOMEN Nov 2022 - Present
Bachelor of Technology in Computer Science Engineering | CGPA: 8.45

SANTHINIKETHAN JUNIOR COLLEGE March 2022
Intermediate | CGPA: 7.17

VISION HIGH SCHOOL March 2020
SSC| CGPA: 9.89

INTERNSHIPS

SOFTWARE DEVELOPMENT INTERN | Datapoint Info Solutions,Hyderabad. March 2024 – Jun 2024

- Developed and tested backend web modules using Node.js and Django, gaining hands-on experience in API development, server-side logic, and database integration.
- Successfully completed internship projects within deadlines, delivering original work and receiving positive performance evaluation from the organization.

Data Analytics Micro Internship | Tata Group (Forage)

- Completed an AI-powered data analytics job simulation focused on business decision-making.
- Conducted Exploratory Data Analysis (EDA) and designed a no-code predictive modeling framework.
- Worked with GenAI-assisted analysis, model logic, and evaluation criteria.

CERTIFICATIONS

Digital marketing course certificate from GOOGLE
Basics of python completion course certificate from INFOSYS
Artificial Intelligence course certificate from ACCENTURE
Applied Data Science with Python certificate from COGNITIVE CLASS.AI
Generative AI for Software Development completion certificate from IBM
Data visualization using Python certificate from IBM

PROJECTS

WEAPON DETECTION USING ARTIFICIAL INTELLIGENCE

Due to growing demand in the protection of safety, security and personal properties, needs and deployment Of video surveillance systems can recognize and interpret the scene and anomaly events play a vital role in Intelligence monitoring.

Benefits are its Enhanced Accuracy, Increased Efficiency,Proactive Prevention, Continuous Improvement .

Technology stack : Python, HTML, CSS , Nodejs

A REAL TIME CROWD DETECTION AND MONITORING SYSTEM USING MACHINE LEARNING

Built a YOLOV5-based vision system to detect,count,and monitor crowds in real time with automated safety Alerts.

Helps ensure public safety by detection overcrowding in real time and enabling quick response.

Technology stack : Python,OpenCV,YOLOv5,Machine Learning Algorithms
